XP 265 - Define, generate, deploy: AI-driven spec-first Terraform

Christian Lechner, SAP
Vipin VijayKumar, SAP
Piotr Tesny, SAP
DJ Adams, SAP

October 2026

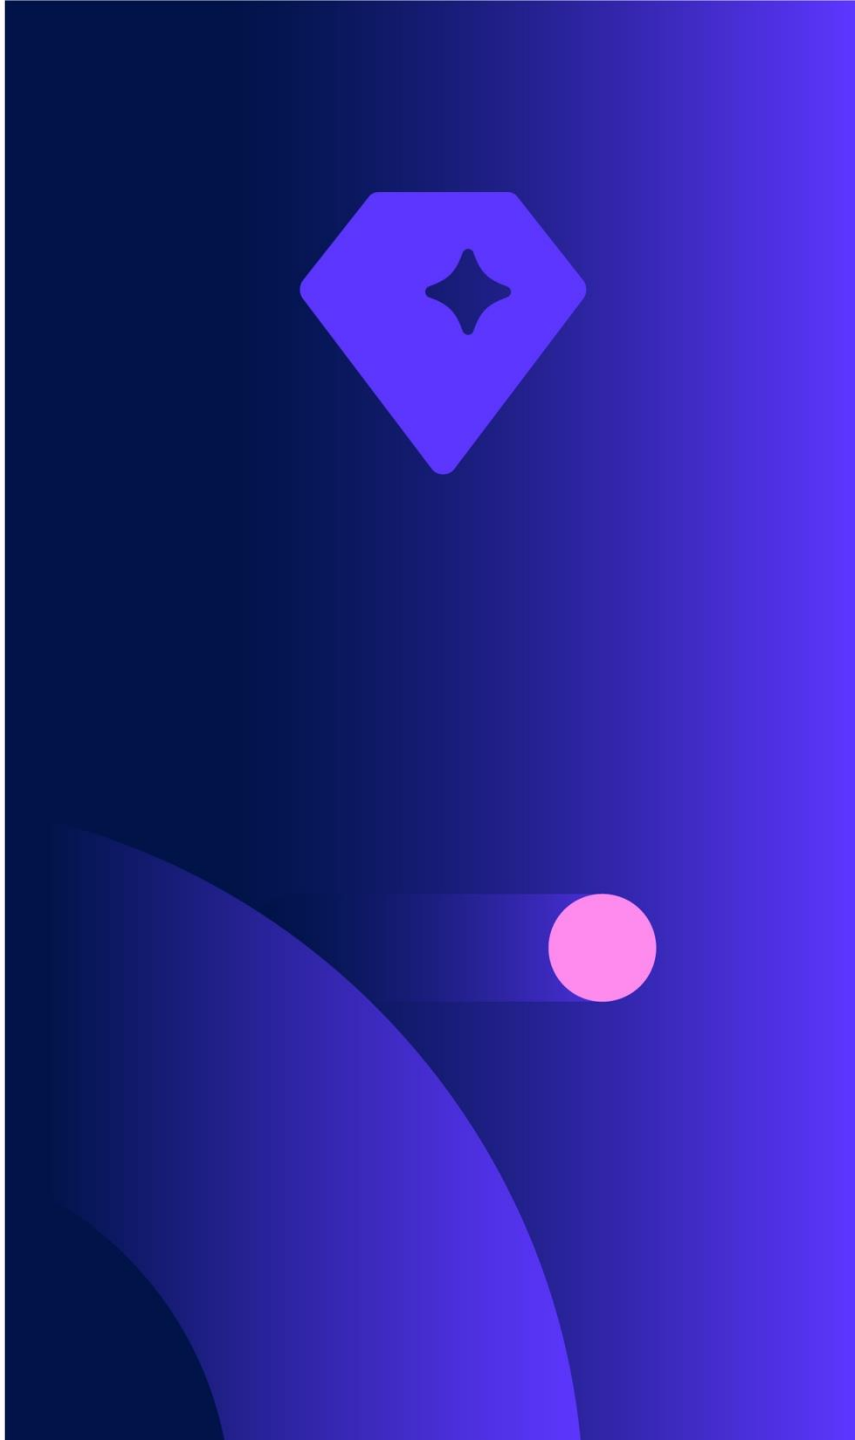

SAP TechEd

Agenda

01 Introduction to Spec-Driven Development.

02 Setup Information

03 Start Building

What is Spec-driven Development?

Limits of “Ad-Hoc” Prompting

Decent setup:

- AI Tooling like Codex or Claude
- MCP Server
- Skills

But

- What where your requirements and your constraints that lead to the generated code?
- The code runs, but did you maybe miss some aspect?

Spec-Driven Development

Create and **iterate** over a **formal, machine-readable specification** before any implementation begins.

The **specification** (documents) becomes the **single source of truth** for the entire lifecycle of the code.

Spec-driven development comes with a tool called **“spec-kit”**

The **spec-kit** provides the **grounding** and **additional tooling** (like skills and templates) to help you create and maintain the specification

At the end, the **specification** is used to **generate** and **validate the implementation**

Spec-Driven Development for IaC by SAP

Offers a **guided process opinionated** towards **Terraform** on SAP Business AI Platform

Baked in **good practices** and **tooling** to help you create and maintain the specification

Target scenarios are **medium-complex to very complex IaC configurations**

In contrast to other spec-kits **we deliver an executable**, so no local python or node environment needed.

Spec-Driven Development for IaC by SAP

Off… **process opinionated** towards **Terraform** on SAP Business AI Platform

Ba… **ing** to help you create and maintain the specification

Target scenarios … **mplex to very complex IaC configurations**

In contrast to other spec-kits **we** … **cal** python or node environment needed.

This is what you will try out in this handson session!

Exercises

Claude Code is an AI tool

We cannot anticipate every action

Focus on the intent and interact with the tool

What if Claude omits a question?

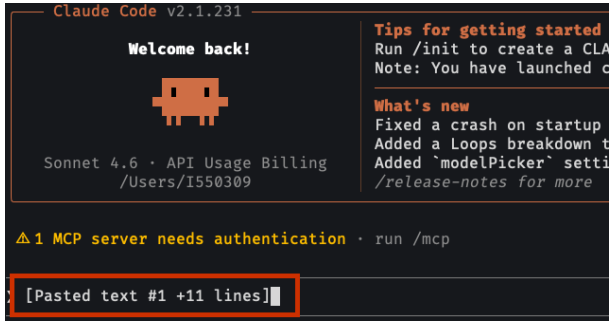

Add the answer when prompted to write the file:

Yes … <Copy your requirement here>

Claude and copying multiple lines

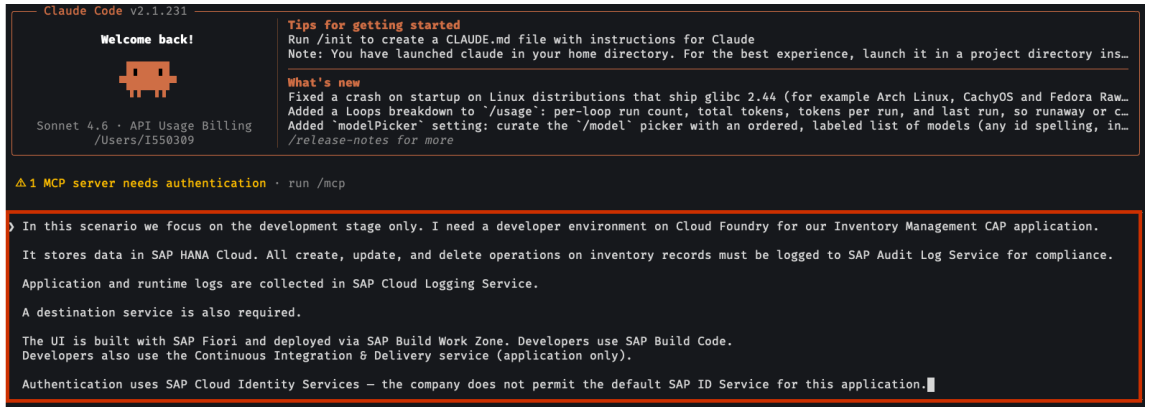

Paste multiple lines into Claude:

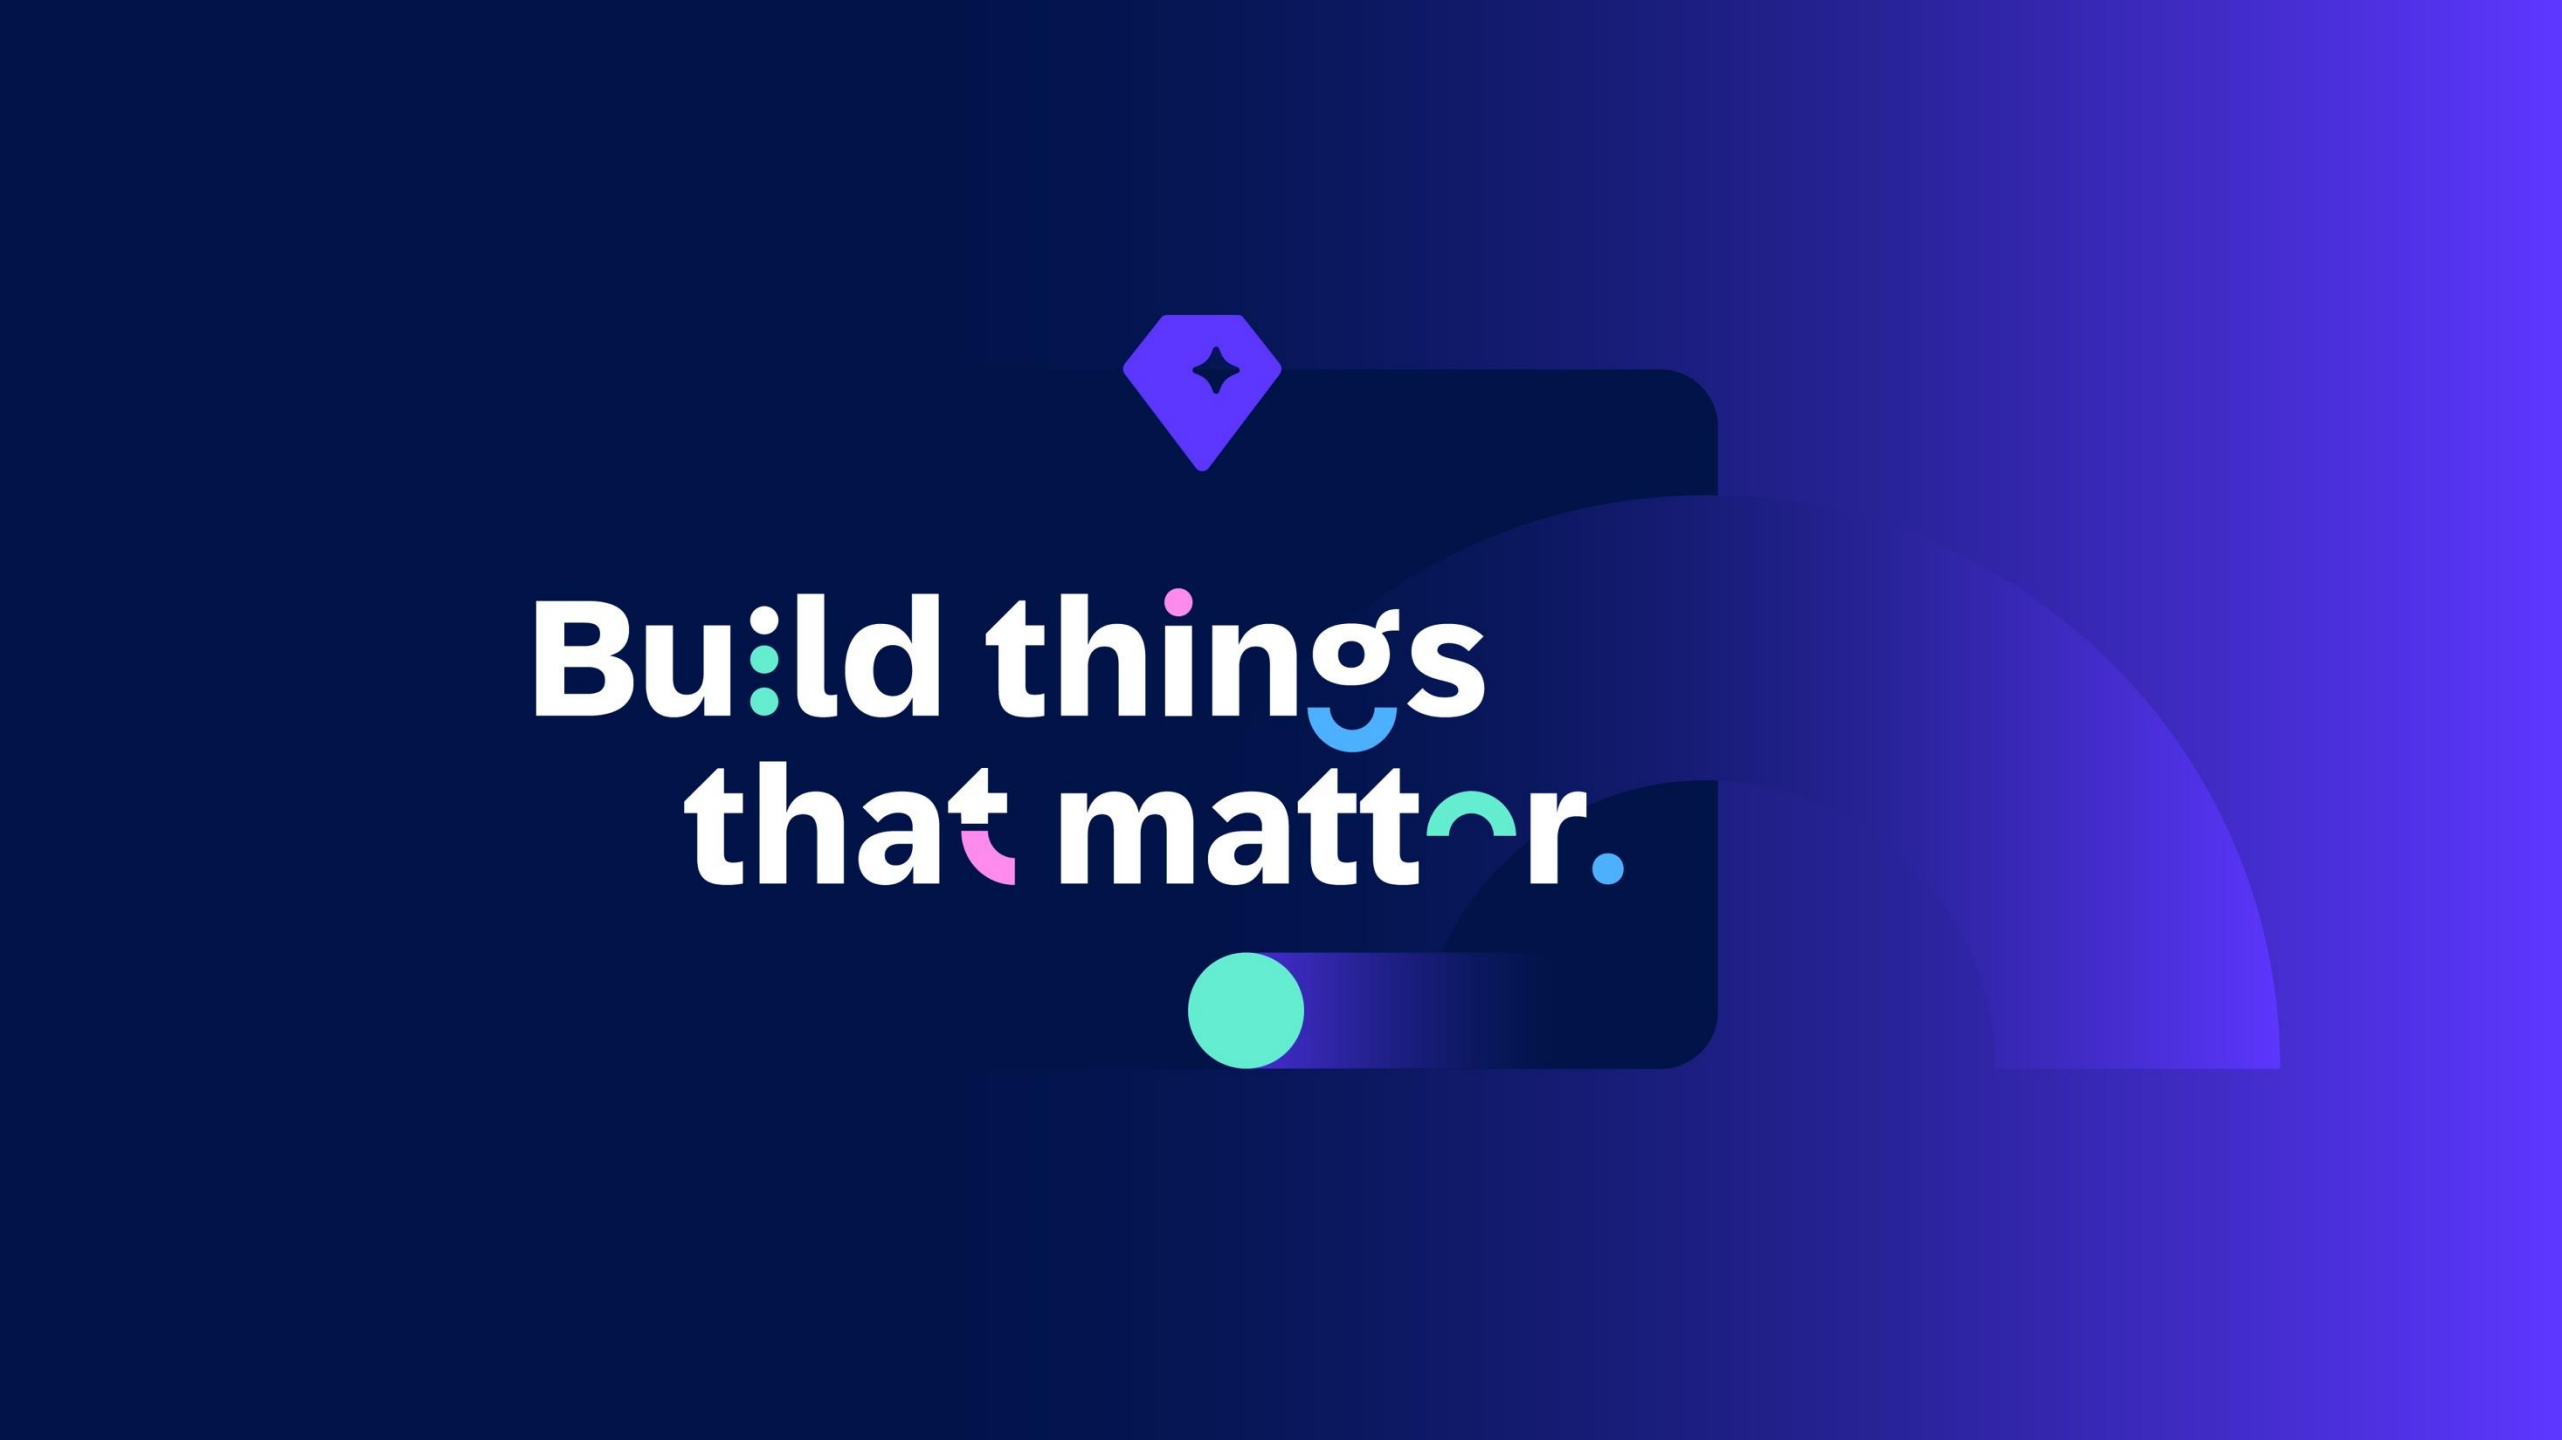

`Ctrl + V` ➔

The official(!) was to bypass this is executing the paste command **twice**

`Ctrl + V Ctrl + V` ➔

Build things
that matter.

Thank you.
